# SUSTAINABILITY & AFFORDABILITY

Try **HAKE & POLLOCK** in your fish and chip shop

## HAKE IT EASY - LIGHT, FLAKY, DELICIOUS!

Hake is an excellent choice for fish and chip shops, offering a softer, flakier texture and a slightly sweeter flavor than traditional options. It's more affordable, making it a cost-effective alternative without sacrificing taste or quality. Hake cooks beautifully in batter, creating a light, crispy coating that complements its delicate flesh. This versatile fish satisfies customers who enjoy the classic fish and chip experience while introducing something new and appealing. Its mild flavor pairs perfectly with traditional sides such as chunky chips, tartar sauce, and mushy peas, making hake a delicious, sustainable option for modern menus.

## PRETTY POLLOCK - TENDER & DELICIOUS!

Pollock is an excellent alternative to cod for any fish and chip shop, offering strong benefits without compromising quality. It is typically far more cost-effective, allowing you to maintain healthy margins while still serving a premium product. Pollock's mild, clean flavour appeals to customers who enjoy classic white fish, and its tender, flaky texture holds up beautifully in batter. It is also highly versatile - ideal for traditional fish and chips, fish bites, or goujons giving you great menu flexibility. By choosing pollock, you can offer great taste and consistency at a lower price, while still meeting customer expectations for delicious, sustainable seafood.
